Re: Hudson and Titus Avenue Pedestrian Safety Improvements

To Whom It May Concern,

This is a letter of support for proposed pedestrian safety projects on Hudson and Titus Avenues.

I would like to highlight the importance of a pedestrian refuge median at the corner of Hudson and Titus. This design feature would meet the standards set in the Town of Irondequoit and Monroe County Active Transportation Plans. The median would slow traffic, improve safety, encourage walking, and beautify the intersection.

Approximately 150 students at Dake Junior High and Irondequoit High School walk and bike through the area to school. Residents walk and bike to nearby businesses and shops. The RTS bus service to Irondequoit Plaza is regularly utilized, as well. By incorporating the pedestrian refuge median, as well as enhanced lighting, all road users will have a safer and more enjoyable experience.

I hope you join me in enthusiastically supporting these much-needed investments in the Town of Irondequoit.

Sincerely,

A handwritten signature in cursive script that reads "Rachel Barnhart".
